Scope of Practice

- We offer the opportunity for credentialing with a scope of practice to qualified PGY2 residents.

North Florida/South Georgia Veterans Health System

The North Florida/South Georgia Veterans Health System (NF/SG VHS) is a comprehensive and integrated health care system that serves the largest number of Veterans nationwide. Our health system contains two medical center campuses. The Malcom Randall VA Medical Center is located in Gainesville, Florida and includes a tertiary inpatient facility and an outpatient center with primary care and specialty clinics. The Lake City VA Medical Center includes an inpatient facility, a palliative care unit, a long-term care facility, and outpatient services including primary care and specialty clinics. The health system also contains several outpatient clinics in Jacksonville, Tallahassee, The Villages, and surrounding areas that provide primary care and specialty services.

Program Purpose

The PGY2 Critical Care Pharmacy residency program builds on Doctor of Pharmacy (Pharm.D.) education and PGY1 pharmacy residency programs to contribute to the development of clinical pharmacists in the specialized areas of critical care. The PGY2 Critical Care Pharmacy residency provides residents with opportunities to function independently as practitioners by conceptualizing and integrating accumulated experience and knowledge and incorporating both into the provision of patient care or other advanced practice settings. Residents who successfully complete this accredited PGY2 pharmacy residency are prepared for advanced patient care, academic, or other specialized positions, along with board certification.
