

# Population Health Management & Data Analytics PGY2

## Program Description

### Purpose:

To develop clinically proficient healthcare data analysts who will improve the quality and outcomes of patient care services. The program promotes the integration of information technology, informatics, and data analysis with the practice of evidence-based medicine and process improvement.

### Skill development will include:

- Development and implementation of performance measures and metrics
- Pharmacy benefit design and formulary management
- Data warehouse management
- SQL server and dashboard development training
- Business intelligence tool training and use
- Academic Detailing, a focus on education and dissemination of knowledge
- Population-based healthcare
- Leadership and management

## COME EXCEL WITH US!

### ABOUT US:

This program was established and accredited in 2013. We have the most experience in training residents in this field, with many past program graduates serving as current preceptors.

The VA Sierra Pacific Network (VISN 21) serves over 460,000 veterans and includes eight VA Medical Centers across Nevada, Northern California, Hawaii and the Philippines.

The VISN residents assist in collaboration with interdisciplinary staff VISN-wide to provide evidence-based care to our Veteran population. The principle location for the resident will be in Reno, NV.

However, residents will work throughout VISN 21 with the PBM Data and Program Managers and VISN 21 Clinical Pharmacy Practitioners.

Currently, candidates will have the option to complete the residency virtually. Some travel will be required.

### HOW TO APPLY:

Positions Available: Two (2) Residents

**Application must be submitted by January 5<sup>th</sup>**

Match ID #: 690281

All application materials should be submitted via

PhorCAS: <http://www.ashp.org/phorcas>
