Residency Director:

Joshua Sullivan, Pharm.D., BCACP, BCPS
(901)-577-7363, (901)-577-7306 (FAX)
josh.sullivan@va.gov

Statement of Purpose:

The purpose of the Memphis Veterans Affairs Medical Center PGY-1 Pharmacy Residency Program is to build from the Doctor of Pharmacy (Pharm.D.) foundation to develop the ability of clinical pharmacists to responsibly manage the medication-related care of patients with a wide range of conditions. Throughout the residency training program, pharmacists will independently and confidently manage patients' disease state-specific drug therapy as integral members of the healthcare team to help achieve appropriate patient outcomes. Additionally, resident pharmacists will proactively manage practice issues, will exhibit effective teaching and communication skills, and will commit to continuous lifelong learning and the advancement of the pharmacy profession. Upon completion of the PGY-1 program, the resident will be eligible for board certification and a PGY-2 pharmacy residency training program.

Overview:

The Memphis Veterans Affairs Medical Center provides comprehensive healthcare to our nation's Veterans and is directly involved in the education of patients and healthcare professionals. Pharmacy services at the VAMC Memphis have been developed to meet the needs of a large institution while anticipating the future roles of pharmacists. Currently, forty-two Clinical Pharmacy Specialists provide direct patient care as well as consultations throughout the hospital and nine associated outpatient clinics as part of ongoing pharmaceutical care services. Since 1963, pharmacy residency training at the VAMC Memphis has allowed residents to participate at an advanced level of practice in an environment that not only accepts their contribution to patient drug therapy but expects it.

Program:

The VAMC Memphis PGY-1 residency program is a twelve-month postgraduate training program accredited by the American Society of Health-System Pharmacists. At the completion of the program, pharmacists will have developed the clinical skills, knowledge, and experience necessary to provide excellent pharmaceutical care to both ambulatory and hospitalized patients. Residents have the opportunity to train with experienced clinical pharmacy specialists in a wide variety of clinical settings. Training schedules allow for flexibility, enabling residents to pursue areas of personal interest. Instructional and educational opportunities are available for residents to develop teaching and precepting skills by presenting lectures, leading small group discussions, and precepting students on clinical rotation. Associated PGY-2 programs in Internal Medicine and Ambulatory Care provide opportunities for training continuity following completion of the PGY-1 year.
